

Price of Outdoor Optical Cable Laying Racks

Article Overview

Outdoor optical cable racks typically range from \$50 to \$500 per unit, depending on size, material, and installation type.

Overview

Outdoor optical cable racks are designed to store and manage surplus fiber optic cables, often mounted on poles or towers and used alongside joint boxes or distribution boxes. They are commonly made from stainless steel or galvanized steel to resist corrosion and withstand harsh environmental conditions. Some models include closures or covers to protect cables from weather and physical damage.

Price Factors

- **Material and Coating:** Stainless steel or hot-dip galvanized racks offer superior durability and corrosion resistance, which increases cost.
- **Capacity and Size:** Larger racks that accommodate more cable or multiple joint boxes are more expensive.
- **Installation Type:** Pole-mounted or tower-mounted racks may require additional hardware, affecting the price.
- **Additional Features:** Some racks include adjustable supports, closures, or modular designs for easier cable management, which can raise the cost.
