

Price of a complete high-voltage power distribution box

Article Overview

The cost of a complete set of high-voltage power distribution boxes typically ranges from several hundred to several thousand USD per unit, depending on specifications, materials, and customization.

Pricing Overview

High-voltage distribution boxes vary widely in price based on voltage rating, amperage capacity, number of circuits, and material construction. Standard industrial or commercial units can start at \$500–\$1,500 for simpler single-busbar configurations suitable for moderate loads, while dual-busbar or fully integrated systems for heavy-duty industrial applications can cost \$3,000–\$10,000 or more per unit. Outdoor-rated, weather-resistant enclosures or units with advanced monitoring and safety features generally carry a premium.

Factors Affecting Cost

- **Material:** Steel, aluminum, and stainless steel enclosures are more durable and heat-resistant, increasing cost, while polycarbonate options are lighter but slightly less expensive.
- **Configuration:** Single busbar systems are simpler and cheaper, whereas dual busbar or sectionalized systems for redundancy and load management are more expensive.
- **Customization:** OEM branding, custom busbar layouts, cable entry modifications,...
