

Price of a complete household two-way distribution box

Article Overview

A complete household two-way distribution box typically costs between \$20 and \$150, depending on features, materials, and included components.

Overview of Pricing

The cost of a two-way distribution box varies based on material, amperage rating, waterproofing, and included components. Basic ABS or plastic indoor boxes with two circuits can start around \$20–\$40 for simple residential use, while more robust units with IP65 waterproofing, ABS+PC construction, and transparent covers suitable for indoor or outdoor installation can range from \$50–\$80 (Amazon listings) . For higher-end or metal boxes with fuse units or 100A capacity, such as the Ryefield CO100DPN 2-way distribution board, prices can reach \$120–\$150, offering enhanced durability, sealable cut-out design, and compliance with electrical safety standards .

Factors Affecting Cost

- **Material and Construction:**
 - Plastic/ABS boxes are lightweight and corrosion-resistant, suitable for indoor or light outdoor use.
 - Metal boxes (steel or aluminum) provide grounding protection and are more durable, often required for higher amperage or outdoor installations .
- **Waterproofing and IP Rating:**
 - IP65-rated boxes protect against dust, rain, and splashes, adding to the cost
