

Price of complete electrical distribution boxes in factories

Article Overview

The price of placing electrical distribution boxes in factories typically ranges from \$1,000 to \$5,000 per unit, depending on specifications, installation complexity, and factory requirements.

Equipment Costs

The cost of a distribution box depends on voltage rating, amperage capacity, number of circuits, material, and safety features. Industrial-grade boxes for factories are generally more expensive than residential or commercial units due to higher durability, larger capacity, and advanced monitoring features. Standard industrial distribution boxes can range from \$1,000 to \$3,000, while highly customized or smart-enabled units may exceed \$5,000 per box .

Installation Costs

Installation involves labor, wiring, conduit, breakers, and permits. For factory settings, costs are influenced by factory size, 3-phase power requirements, ceiling height, and accessibility. Labor rates vary by region, typically \$75-\$100+ per hour for licensed electricians, with total installation costs per box ranging from \$500 to \$2,000, depending on complexity . Additional costs may arise for backup power integration, fire protection, and energy management systems .
