

Price of electrical cable trays for pipe shafts

Article Overview

The cost of electrical cable trays for pipe shafts varies widely depending on material, size, load capacity, and finish, typically ranging from \$20 to \$150 per meter for standard steel trays.

Factors Affecting Price

- **Material:**
 - Steel (pre-galvanized or hot-dip galvanized) is the most common for industrial and commercial applications, offering durability and corrosion resistance .
 - Stainless steel is more expensive but ideal for harsh or corrosive environments .
 - Non-metallic options (PVC or halogen-free plastic) are lighter and cheaper but less suitable for heavy loads .
- **Tray Type and Duty Rating:**
 - Light-duty trays are suitable for small cable bundles and low loads, costing less.
 - Medium-duty trays handle moderate loads and are often pre-galvanized, with prices higher than light-duty .
 - Heavy-duty trays support large power cables and busbars, often hot-dip galvanized or stainless steel, and are the most expensive .
- **Dimensions:**
 - Widths typically range from 50mm to 600mm, and standard lengths are 1m or 3m, with longer lengths or custom sizes increasing cost .
 - Tray height and thickness also affect price, as thicker steel supports heavier loads...
