

Price of electrical distribution boxes for construction sites in North Macedonia

Article Overview

Electrical distribution boxes for construction sites in North Macedonia typically range from €150 to €1,200 per unit, depending on specifications, voltage, and safety features.

Overview

Electrical distribution boxes are essential for safely distributing power on construction sites, workshops, and temporary installations. They are designed to handle high current capacities, typically from 16 A to 63 A, and provide multiple outlets with individual circuit breakers and RCD protection, ensuring safety and fault isolation . Construction site boxes can be mobile or fixed, with options for 230 V single-phase or 400 V three-phase systems .

Factors Affecting Price

- Voltage and Amperage Ratings: Higher voltage or three-phase systems cost more due to increased capacity and safety requirements .
- Material and Durability: Outdoor-rated boxes with weather-resistant enclosures (IP65-IP67) or robust sheet steel housings are more expensive than indoor units .
- Number of Circuits and Outlets: More circuits and integrated safety devices increase the cost .
- Customization: Special configurations, pre-wiring, or integration with building management systems can significantly affect pricing .
- Compliance and Certification: Units meeting IEC 61439, IEC 60364, and local elect...
