

Price of equipment for cable tray fabrication

Article Overview

Cable tray manufacturing machines typically range from \$15,000 for basic semi-automatic units to over \$150,000 for fully automated, high-capacity production lines.

Price Ranges by Machine Type

- Semi-Automatic Cable Tray Roll Formers: These are suitable for small-scale production and have simpler mechanical controls. Prices generally start around \$15,000–\$30,000, depending on size and tooling options .
- Automatic Cable Tray Roll Forming Machines: CNC-operated machines capable of producing ladder, solid, or ventilated trays in one line. These machines offer high precision and efficiency, with prices typically ranging from \$50,000 to \$100,000 .
- Customized or High-Capacity Production Lines: Fully integrated systems with automated feeding, punching, cutting, welding, and forming stations for large-scale or specialized tray designs. These lines can cost \$100,000–\$150,000 or more, depending on the number of forming stations, automation level, and additional features like servo-electric pullers or rotary shears .

Factors Affecting Price

- Automation Level: Fully automated lines reduce labor costs and increase throughput but have higher upfront costs.
- Production Capacity: Machines designed for high-volume manufacturing or continuous roll forming are more expensive.
- Tray Design Flexibility: Equipment capable of producing multiple tray types (ladder...
