

Price of fireproof cable trays for utility tunnels

Article Overview

Fireproof cable trays for utility tunnels typically range from \$50 to \$300 per meter, depending on material, fire rating, and load capacity.

Price Estimates by Material

- **Steel Fireproof Cable Trays:** The most common choice for heavy-duty tunnel applications due to high structural strength and fire resistance. Prices generally range from \$100 to \$300 per meter, with galvanized steel options offering additional corrosion protection for humid tunnel environments .
- **Aluminum Fireproof Cable Trays:** Lightweight and corrosion-resistant, suitable for tunnels with weight constraints. Prices are typically \$80 to \$200 per meter, depending on thickness and fireproof coating .
- **Composite/Non-Metallic Fireproof Trays:** Increasingly used for specialized fire-resistant applications. Prices vary widely, often \$120 to \$250 per meter, reflecting advanced material properties and fireproof certifications .

Factors Affecting Cost

- **Fire Resistance Rating:** Trays certified to international standards like EN16537 or NEMA VE1 command higher prices due to verified fireproof performance .
- **Load Capacity:** Heavy-duty trays capable of supporting 200 kg/m or more cost more than standard trays designed for lighter cable loads .
- **Corrosion Protection:** Hot-dip galvanized steel or stainless steel trays for humid or underground tunnels increase upfront costs but reduce long-term maintenance
