

Pricing for Elbows in Cable Trays

Article Overview

Cable tray elbows typically range from \$1.30 per piece for basic galvanized steel to higher prices for stainless steel or specialized materials, with costs influenced by material, size, and installation requirements.

Typical Pricing

- Galvanized Steel Elbows: Bulk prices start around \$1.30 per piece, suitable for standard industrial applications and general cable management .
- Stainless Steel Elbows (304/316): These are more durable and corrosion-resistant, often used in harsh environments like chemical plants or offshore facilities. Prices are higher than galvanized steel, reflecting material quality and longevity .
- Aluminum or FRP Elbows: Aluminum offers lightweight corrosion resistance, while FRP (fiber-reinforced plastic) is ideal for highly corrosive or outdoor environments. FRP elbows are generally more expensive due to specialized manufacturing and performance benefits .

Factors Affecting Cost

- Material and Corrosion Resistance: Stainless steel and FRP provide higher durability and compliance with industry standards (e.g., ASTM A123 for galvanizing, UL Classified for fire resistance), which increases unit cost .
- Size and Bend Radius: Larger elbows or those with tighter bend radii require more material and precise manufacturing, impacting price .
- Tray Compatibility: Elbows must match the main cable tray type (ladder, perforated, solid bottom, wire mesh) and load rating, which can influence cost .
- Installation Considerations: Total installed cost includes shipping, handling, labor,...
