

Ranking of Optical Module Investment Value

Article Overview

Optical modules, particularly 400G/800G coherent transceivers for hyperscale data centers and AI workloads, represent the highest investment value due to strong market growth, technological adoption, and high demand.

Market Overview and Growth Potential

The global optical module market is experiencing robust growth, driven by hyperscale cloud expansion, AI and generative AI workloads, 5G network deployment, and data center upgrades. Market projections indicate:

- Overall market size: USD 26.53 billion in 2025, expected to reach USD 66.94 billion by 2032, with a CAGR of 14.13% .
- Optical module chips: From USD 823 million in 2024 to USD 1.52 billion by 2032, CAGR 8.0% .
- Global optical modules: USD 14.8 billion in 2025, projected to USD 39.6 billion by 2034, CAGR 11.5% .
- Unit sales: 88-117 million units in 2024, with average prices of \$150-200 per unit .

The fastest-growing segments are 400G and 800G modules, including QSFP28, QSFP+, and coherent transceivers, which are critical for AI training clusters, hyperscale cloud interconnects, and high-speed telecom backhaul .
