

Recommended Installation Information for Distribution Boxes in Tuvalu

Article Overview

Installing a complete distribution box in Tuvalu requires selecting the right type, following safety standards, and using certified components to ensure reliable and safe electrical distribution.

Types of Distribution Boxes

Distribution boxes (DB boxes) serve as central hubs for electrical power distribution. Common types include:

- Main Circuit Breaker Panel: Controls the entire electrical system and houses the main breaker for safety and overload protection. Ideal for commercial and industrial applications ().
- Main Lug Panel: Connects directly to a main panel without a main breaker, often used as a sub-panel for secondary power distribution ().
- Sub Panel: Distributes power to specific areas, such as different floors or sections of a building, providing localized control ().
- Fuse Box: Uses fuses instead of circuit breakers, typically found in older installations ().
