

Somali cable tray mesh price inquiry

Article Overview

A single wire mesh cable tray typically costs between \$2 and \$34 per unit, depending on material, size, and supplier.

Price Range and Factors

The cost of a wire mesh cable tray varies widely based on material, finish, and size. Common materials include:

- Pre-Galvanized Steel: Most affordable, suitable for dry indoor areas like offices or schools, typically at the lower end of the price range (\$2-\$15 per meter) .
- Hot-Dip Galvanized Steel: More durable for outdoor or industrial environments, slightly higher cost due to thicker zinc coating .
- Aluminum: Lightweight and corrosion-resistant, generally more expensive than steel, often used where weight reduction is important .
- Stainless Steel: Highest cost, used in hygienic or corrosive environments such as food plants or coastal areas . For small-scale consumer purchases (B2C), prices range from \$15 to \$34 per tray, while wholesale or bulk orders (B2B) can be as low as \$0.80 per unit depending on quantity and supplier .

Additional Cost Considerations

- Supports and brackets: Typically add 20-30% to the total cost, as each tray requires mounting hardware to secure it to walls, ceilings, or floors .
- Bends, tees, and covers: If the installation requires corners or outdoor protection, these accessories can significantly increase the overall cost
