

Specific price for 96-core optical fiber cable

Article Overview

The price of a 96-core optical fiber cable typically ranges from \$0.30 to \$6.50 per meter, depending on fiber type, brand, and protective features.

Price Range and Factors

- Base price: Generic 96-core fiber optic cables can cost \$0.30 to \$2.80 per meter, depending on the quality of the glass and manufacturer .
- Premium brands: High-quality cables from brands like Corning or CommScope may cost more due to lower attenuation and better long-distance performance .
- Multimode fibers (OM3/OM4): These are more expensive, typically \$1.50 to \$6.00 per foot, because of the wider core and stricter manufacturing standards .
- Armored or outdoor cables: Cables with steel tape armor or ruggedized jackets for outdoor use can cost \$1.15 to \$6.50 per meter, providing protection against physical damage, rodents, and environmental factors .
- Cable specifications: Single-mode (OS2) vs multimode, gel-free vs gel-filled, and LSZH (Low Smoke Zero Halogen) vs PVC jackets all influence the price .

Additional Considerations

- Installation environment: Outdoor, aerial, or duct installations may require more durable jackets and water-blocking features, slightly increasing cost .
- Length and bulk orders: Buying in bulk or longer lengths can reduce the per-meter cost, while short runs may be more expensive....
