

Standard nomenclature for circuit breakers in distribution boxes

Overview

Typical code letters include Q for circuit breakers, T for transformers, A for assemblies (switchboards), etc. There are specified in more detail in IEC 60617 for each type of device. Generally we number each product in a logical fashion which fits the project (i. -Q1, -Q2 . The IEC publishes a series of documents and rules governing the preparation of documents, drawings and the referencing of equipment. Often when IEC.
