

Supply of Ladder-Type Cable Trays in Iraq

Article Overview

Ladder-type cable trays are widely available in Iraq through multiple suppliers and manufacturers offering durable, customizable solutions for industrial and infrastructure projects.

Overview of Ladder-Type Cable Trays

Ladder-type cable trays consist of two side rails connected by rungs, providing strong support and easy access to cables from both top and bottom. They are ideal for heavy-duty applications and complex, multi-directional cable networks. The open design allows heat dissipation and prevents moisture buildup, making them suitable for long cable runs, sometimes up to 30 feet. Rung spacing is typically 9 inches, with options for 12 or 18 inches, allowing flexible cable entry and exit points. Materials include steel, stainless steel, aluminum, and fiberglass, with finishes such as hot-dip galvanization, electroplated zinc, powder coating, or stainless steel finishing for durability. Ladder trays are available with or without covers .
