

Temporary construction power distribution box in Algeria

Article Overview

Temporary construction power distribution boxes provide safe, portable, and reliable power for construction sites and industrial projects in Algeria.

Overview

Temporary power distribution boxes, often called spider boxes or portable distribution units, are designed to deliver electricity safely to multiple tools and equipment in environments where permanent power is unavailable. They are widely used on construction sites, industrial facilities, outdoor events, and emergency setups. These units are engineered for durability, portability, and safety, with rugged enclosures that withstand harsh weather, dust, and mechanical impacts.

Key Features

- **Multiple Outlets:** Most boxes provide several outlets, including 20A, 30A, and 60A receptacles, allowing simultaneous connection of various tools and machinery.
- **Power Ratings:** Temporary distribution boxes can handle power demands ranging from 10 kW to 200 kW, accommodating both small tools and heavy-duty equipment like concrete mixers and welding machines.
- **Safety Protections:** Equipped with Residual Current Devices (RCDs), circuit breakers, and overload protection to prevent electric shocks and equipment damage.
- **Portability:** Compact and lightweight designs make them easy to transport and se...
