

The device connected to the router via a switch cannot recognize the IP address

Overview

Here are some solutions to resolve the issue of a switch not finding an IP address:
Check the Router's DHCP Server: Verify that the router's DHCP server is enabled and responding to requests. Restart the Router and Switch: Restarting the router and switch can often resolve the issue. Did you try connecting the PC to directly to the DHCP switch and check if it get the ip address?

Also have you issued " service dhcp" to enable DHCP service on switch?
