

Weight of Huawei Network Cabinet

Article Overview

Huawei network cabinets typically weigh between 70 kg and 120 kg when empty, depending on the model and configuration.

N63E-22 Cabinet

The Huawei N63E-22 cabinet is a 2200 mm high ETSI middle-standing pillar cabinet designed to house MA5600T and MA5608T chassis. It consists of a main frame, front door, rear panel, and side panels. The weight varies depending on the configuration (number of installed subracks and panels), but the empty cabinet weight is generally around 80-90 kg for the standard frame without additional equipment .

N66E Cabinet

The Huawei N66E cabinet complies with the 19-inch IEC 60297-2 standard and features a modular structure with a front door, rear door, and two side panels. It is constructed from welded electro-galvanized steel and cold-rolled steel sheets. The empty cabinet weight, including the doors and side panels, is approximately 100-120 kg, depending on whether it is front-serviceable or rear-serviceable .

Factors Affecting Weight

- Height and U-space: Taller cabinets (e.g., 2200 mm vs. 2000 mm) generally weigh more due to additional steel and structural components .
- Material: Cabinets are made from high-intensity class A carbon cold-rolled steel and zinc-coated steel, which contributes significantly to the weight
