

What is Brazilian optical cable

Overview

Brazil is a major Brazil supplier of fiber optic cables. The country has previously relied on copper cables to provide broadband access, but due to the increasing demand for high-speed internet, the government is now looking to take advantage of the increasingly. Our optical cables have been installed throughout Latin America since 2005 in the most diverse environments and climates. We have a wide range of cable designs for a wide range of applications, from the simplest aerial cables to direct buried or flame retardant cables for the most severe uses. Brazil's rapidly expanding. Six thousand kilometers beneath the Atlantic, a bundle of glass fibers no thicker than a garden hose is quietly reshaping how Brazilians reach the internet. It has no name most people would recognize, no flashy headquarters, and no consumer-facing app. But EllaLink may be one of the most. As a country with a long coastline, fibre – both terrestrial and submarine – forms a vital part of Brazil's connectivity mix, although there are actually more mobile connections than broadband ones at present. On the subsea side, Fortaleza is emerging as a subsea landing point thanks to its.
