

Which UK electrical distribution box is the best

Article Overview

High-quality UK distribution boxes include brands like Schneider Electric, Eaton, HENSEL, and Kopp, offering robust safety, durability, and versatile configurations for domestic and commercial use.

Key Considerations

When choosing a distribution box in the UK, consider the following:

- **Type of Board:** Domestic properties typically use single-phase consumer units, while industrial or commercial settings may require three-phase distribution boards for higher power demands .
- **Safety Features:** Look for boards with RCDs (Residual Current Devices), RCBOs, and overcurrent protection to prevent overloads, short circuits, and earth faults .
- **Material and Durability:** High-quality boxes are made from flame-retardant, impact-resistant plastic or metal, often rated IP65 for water and dust protection, suitable for indoor and outdoor use .
- **Number of Ways:** Choose a board with sufficient circuit capacity (4 to 24+ ways) depending on the number of circuits in your property .

Recommended Brands

- **Schneider Electric:** Offers the Memshield Type A range, known for high integrity, robust protection, and flexible configurations .
